Be part of the solution

Avani Eco is embarking on a mission to alleviate this plastic pandemic problem and help rehabilitate the island by offering eco-friendly packaging made from plants.

Free design touch & digital mockup!

We can create using only your submitted company logo. Our team is ready to add a design touch and get creative. You will also receive a free mock-up service, which allows you to see a final product before actual production begins.

Cassava Bag

Avani bags are purely made from 100% bio-based material utilizing industrial grade cassava starch, a derivative of vegetable oil and other natural materials. This unique composition is considered worldwide to be the lowest cost bio-plastic.

High performance
underload of dry
weights

Biodegradable
& compostable
within months

Contains no
petrochemicals

Good oxygen barrier
and anti-static
properties

Customizable
based on MOQ

PLA Cup, Bowl & Straw

Avani clear cup, clear bowl & straw are made from polylactic acid (PLA) or cornstarch. This performs much like traditional plastic, however, the crucial benefit behind this is that they are 100% certified biodegradable and compostable.

Compostable in commercial
composting facility

Looks-feels-performs
like plastic

Made from
renewable resources

Customizable
based on MOQ

PLA Cutlery

Avani PLA cutlery is made from polylactic acid (PLA) or cornstarch. This performs much like traditional plastic. However, the crucial benefit behind this is that they are 100% certified biodegradable and compostable (in commercial composting facilities).
